OpenCDS: a Clinical Decision Support Infrastructure Based on Drools

October 22, 2012 IntelliFest 2012 Conference San Diego, California

David Shields

Lead Developer, OpenCDS
Senior Informaticist, Information Technology Services, Univ. of Utah
david.shields@utah.edu

Agenda

- HL7 Decision Support Service (DSS) standard
- HL7 Virtual Medical Record (vMR) standard
- OpenCDS
- Demo
- Discussion

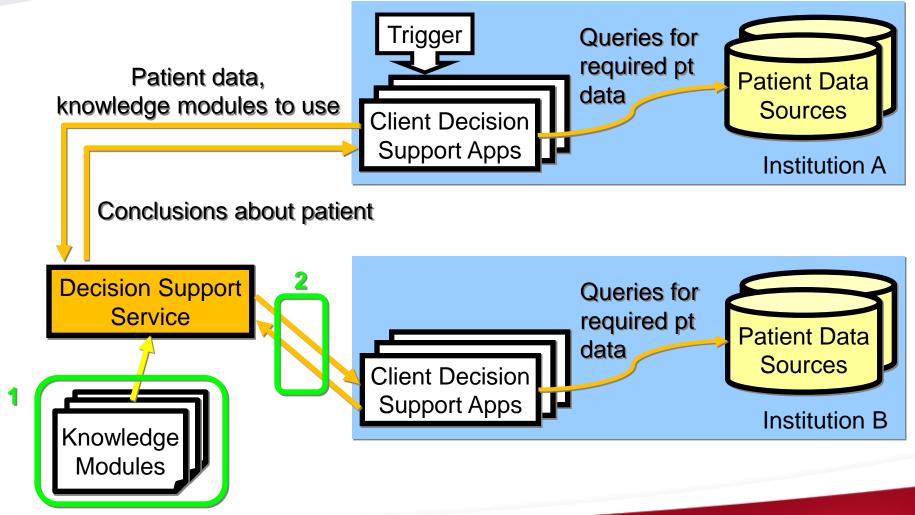

HL7 Decision Support Service (DSS) Standard

Decision Support Service (DSS) – Overview

- Business purpose:
 - To facilitate implementation and maintenance of clinical decision support (CDS) applications
- Approach:
 - Evaluates patient data (inputs) using knowledge modules and returns machine-interpretable conclusions (outputs)
- Normative HL7/ANSI standard

DSS – Architectural Overview

DSS Knowledge Module (KM) – Components

- Descriptive traits
 - E.g., authors, keywords, purpose, explanation
- Data requirements
 - Example
 - Input: patient's list of active problems and medications
 - Output: disease management recommendations
- Semantic requirements
 - Example
 - Input Requirement: HL7 Continuity of Care Document (CCD), HL7 vMR Input
 - Output Requirement: HL7 Care Plan, HL7 vMR Output

DSS: SOAP Envelope

DSS KM – Sample Inferences

Sample Evaluation Input	Sample Evaluation Output					
Patient age, gender, past health maintenance procedures	List of health maintenance procedures due or almost due					
Medication identifier, age, gender, weight, serum creatinine level	Recommended maximum and minimum doses for medication given patient's estimated renal function					
Insurance provider, data relevant to prescription	Prior authorization to prescribe medication					
CCD	Wide range of care recommendations					

DSS – Primary Service Operations

HL7 Virtual Medical Record (vMR) Standard

Background

- A "holy grail" of clinical informatics is scalable, interoperable CDS
- Key requirement for interoperable CDS and re-use of CDS knowledge resources = use of a common patient data model
 - Referred to as a "Virtual Medical Record" or vMR
 (Johnson et al., AMIA Annu Symp Proc, 2001)
- Lack of a common vMR has been a major barrier to sharing knowledge and scaling CDS

Example Challenge without VMR

Observation

Code = BP

Value = 120/80 mmHg

Blood Pressure

Systolic = 120 mmHg

Diastolic = 80 mmHg

Observation

Code = BP

Observation

Code = SBP

Value = 120 mmHg

Observation

Code = DBP

Value = 80 mmHg

Vital Sign

Type = BP

Value = 120/80

Units = mmHg

vMR Goal

 Provide common information model upon which interoperable clinical decision support resources (e.g., rules) can be developed

Project History

- Analysis of data required by 20 CDS systems from 4 countries (Kawamoto et al., AMIA 2010)
- Refinement of vMR via implementation within OpenCDS
- Adopted in September 2011 as Informative Specification

Why Not Just Use the CCD as the vMR?

- CCD does not include all needed information
 - E.g., Family history model suitable for CDS
- CCD is not sufficiently intuitive for direct use by CDS knowledge authors

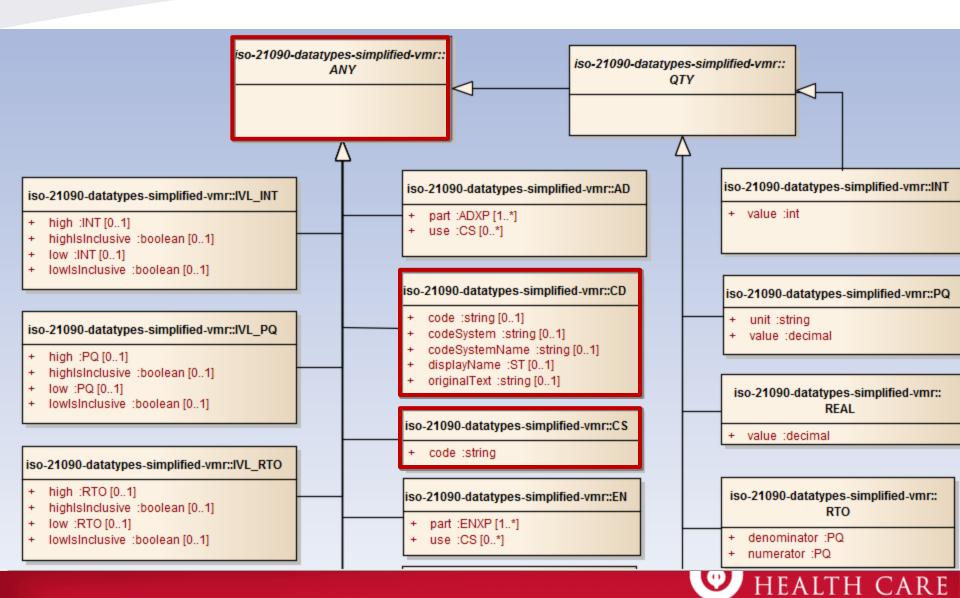

Problem Model – CCD vs. VMR

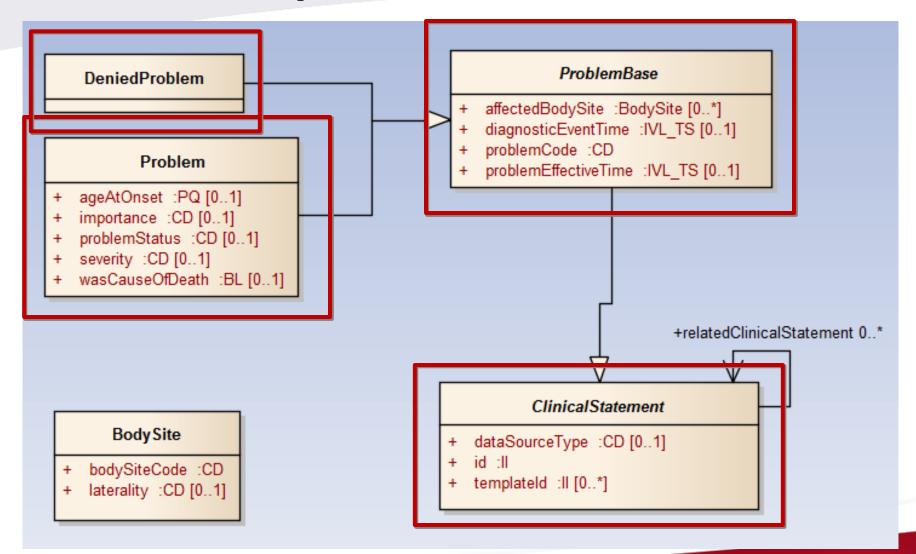

```
<entry typeCode="DRIV">

OpenCDS

OpenCDS

Goal

 Facilitate widespread availability of advanced CDS capabilities through open-source, collaborative development of standards-based DSS infrastructure, tooling, and high-value services

Methods

- Support HL7 DSS and vMR standards
- Leverage JBoss Drools and jBPM
- Develop all components required to author, test, and operationally support standards-compliant DSSs
- 1.1 release freely available under Apache 2 open-source license

Collaborators

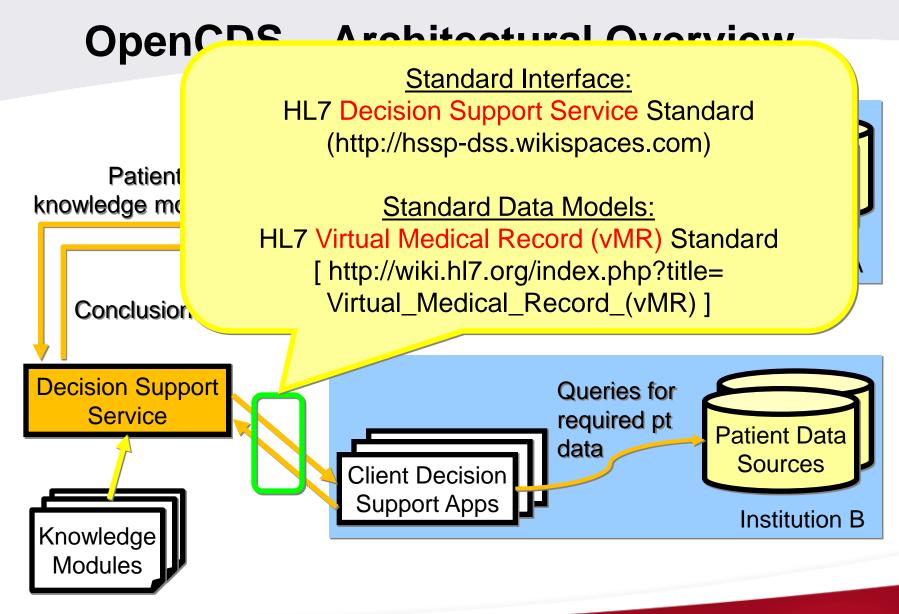

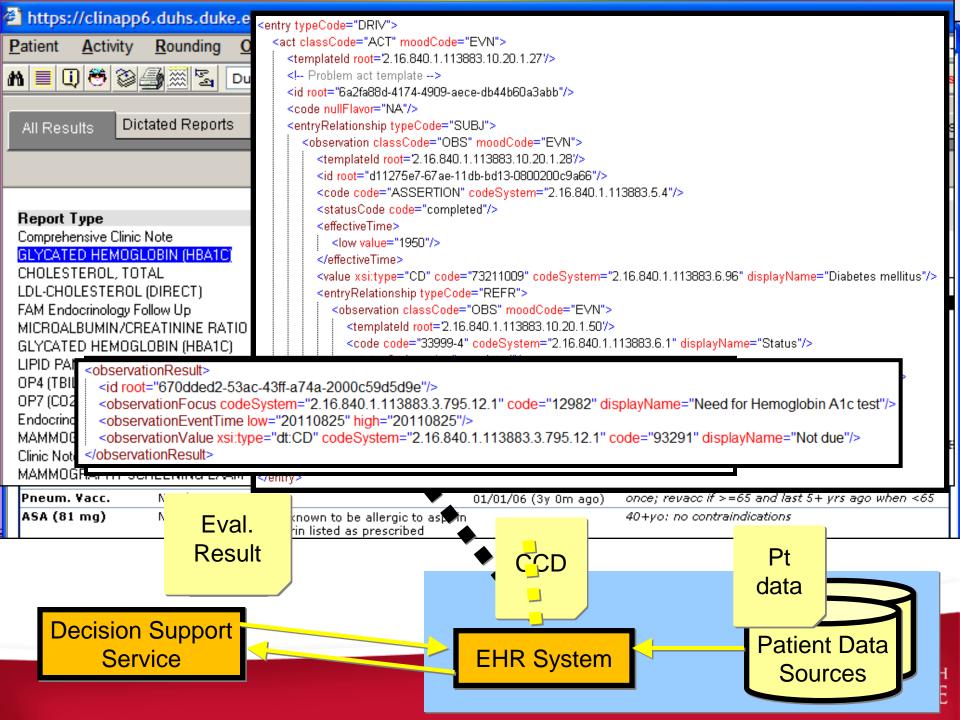

NQF Measure 31 for Meaningful Use

What is OpenCDS?

OpenCDS is a multi-institutional, collaborative effort to develop open-source, standards-based clinical decision support (CDS) tools and resources that can be widely adopted to enable CDS at scale.

Who is Involved?

OpenCDS was founded by Dr. Kensaku Kawamoto, MD, PhD, who is a faculty member at the University of Utah Department of Biomedical Informatics and a co-chair of the HL7 CDS Work Group. OpenCDS

Breaking News

OpenCDS 1.0 Release Available The OpenCDS 1.0 Release is now available to collaborators. Please see the 1.0 Release tab for more information.

Posted Mar 31, 2012 11:25 AM by Kensaku Kawamoto

OpenCDS 1.0 Release Candidate Avaiable The OpenCDS 1.0 Release Candidate is now available to collaborators. Please see the 1.0 Release tab for more information.

Posted Jan 16, 2012 4:17 AM by Kensaku Kawamoto

OpenCDS Alpha Release Available An alpha release of OpenCDS is now available to collaborators.

Posted Jan 16, 2012 4:16 AM by Kensaku Kawamoto
